Connor Boyer

SKILLS

Skilled in Python, Java, C++, and C#, I specialize in data parsing, automation, and system diagnostics on Windows, Mac OS, and Linux. My experience includes building and repairing systems, resolving hardware/software issues, data recovery, and software testing to improve security and performance. Proficient in Adobe Premiere Pro and SEO, I analyze data trends to optimize digital content. As an eSports coach, I've honed leadership, strategy development, and team collaboration skills, applying Agile methodologies.

EXPERIENCE

Technology Paraeducator / Educator – *Andover Elementary, Andover MN*

August 2022 – Current

- Conducted two weekly classes teaching technology skills to students, focusing on practical applications and problem-solving.
- Operate over 2,400 devices and ensure they are working correctly
- Coordinate and fix over 180 teachers' and staff's devices and electronics
- Organize and update all technology inventory every week
